

Nazmul Ahsan

Web Developer

Chattogram, Bangladesh | Phone:+8801775647344 | nazmulahsan.121291@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Objective

Motivated Web Developer seeking an entry-level position to apply skills in JavaScript, React, Python, FastAPI, REST APIs, and databases. Eager to develop reliable web applications, solve technical problems, and grow within a professional software development team.

Skills

Technical Skills:

- Languages: JavaScript, Python
- Libraries / Frameworks: React.js, Next.js, Express.js, Tailwind CSS, Redux
- Technologies: Firebase, Node.js, MongoDB, MySQL, PostgreSQL
- Tools: Git & GitHub, ESLint, Vercel, Netlify, Postman

Soft Skills: Active Listening, Critical Thinking, Responsibility, Leadership

Projects

Ambulance Booking– Ambulance Dispatch System

[Live Site](#) | [Client](#) | [Server](#)

A full-stack ambulance booking system to streamline booking requests, admin dispatching, and driver trip updates.

- Designed a full-stack application with role-based access control across User, Admin, and Driver portals. .
- Engineered high-performance FastAPI REST APIs for instant dispatching, dynamic driver allocation, and real-time trip status updates.
- Designed PostgreSQL schemas to manage user roles, driver availability, booking workflows, state transitions, and location-based data.
- Developed interactive React.js interfaces tailored for real-time admin monitoring and driver workflow controls.

Technologies: ReactJS, TailwindCSS, React Router, Python, FastAPI, PostgreSQL, Supabase

FarmFresh – Full-Stack E-Commerce Platform

[Live Site](#) | [Client](#)

Engineered a full-stack e-commerce web application utilizing Next.js App Router and MongoDB, implementing role-based access control (RBAC) across distinct Customer and Farmer/Vendor portals.

- Implemented parallel and intercepting routes for seamless modal authentication and quick-view experiences with direct URL support.
- Developed product filtering, verified-purchaser reviews, dynamic order tracking, PDF invoice generation, and automated email delivery via Nodemailer.
- Built secure JWT access/refresh authentication with HTTP-only cookies and integrated Google OAuth for seamless sign-in and session persistence.
- Optimized SEO and performance using Server Components, dynamic Open Graph metadata, and responsive UI patterns.

Technologies: Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, NextAuth, Nodemailer
