

Nazmul Ahsan

Web Developer

Chattogram, Bangladesh | Phone:+8801775647344 | nazmulahsan.121291@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Objective

Motivated Junior Web Developer seeking an entry-level position to apply skills in JavaScript, React, Python, FastAPI, REST APIs, and databases. Eager to develop reliable web applications, solve technical problems, and grow within a professional software development team.

Skills

Technical Skills:

- Languages: JavaScript, Python
- Libraries / Frameworks: [React.js](#), [Nest.js](#), Express.js, Tailwind CSS, Redux
- Technologies: Firebase, Node.js, MongoDB, MySQL, PostgreSQL
- Tools: Git & GitHub, ESLint, Vercel, Netlify, Postman

Soft Skills: Active Listening, Critical Thinking, Responsibility, Leadership

Projects

Ambulance Booking– Ambulance Dispatch System

[Live Site](#) | [Client](#) | [Server](#)

A full-stack ambulance booking system to streamline booking requests, admin dispatching, and driver trip updates.

- Architected full-stack web application with role-based access control (RBAC) across User, Admin, and Driver portals.
- Engineered high-performance REST APIs using FastAPI to enable instant trip dispatching, dynamic driver allocation, and live status tracking (**Pending** → **Assigned** → **En Route** → **Completed**).
- Designed relational database schemas in PostgreSQL to manage complex state transitions, user roles, driver availability, and geospatial booking data.
- Developed interactive React.js interfaces tailored for real-time admin monitoring and driver workflow controls.

Technologies: React, TailwindCSS, React Router, Python, FastAPI, PostgreSQL, Supabase

FarmFresh – Full-Stack E-Commerce Platform

[Live Site](#) | [Client](#)

Engineered a full-stack e-commerce web application utilizing Next.js App Router and MongoDB, implementing role-based access control (RBAC) across distinct Customer and Farmer/Vendor portals.

- Architected advanced Next.js UX features including parallel and intercepting routes (`@modal`) to deliver seamless, accessible modal authentication and quick-view flows with direct URL support.
- Built business-critical e-commerce features including category/keyword filtering, single-review enforcement for verified purchasers, dynamic order status management, and automated PDF invoice generation dispatched via Nodemailer.
- Designed a secure dual-token authentication workflow (JWT access and HTTP-only refresh cookies) alongside Google OAuth for seamless user sign-in and session persistence.
- Optimized SEO and load performance using Next.js Server Components, dynamic Open Graph metadata, and responsive layout patterns. .

Technologies: Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, NextAuth, Nodemailer

Education

University of Chittagong
